

Using Keys

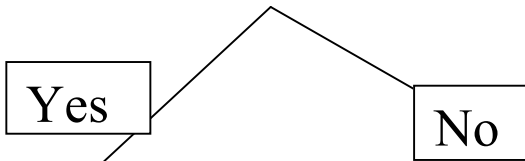

Does it move from one place to another?

Animal

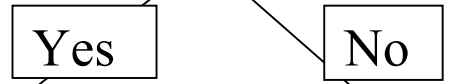

Plant

Does it have a back bone?

Vertebrate

Does it have flowers?

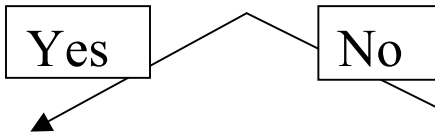

Flowering

Non-Flowering

Invertebrate

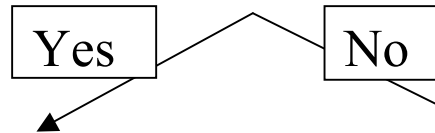

Does it give birth to live babies?

Has it got a shell?

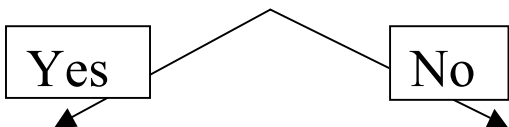

Mammal

Does it have feathers?

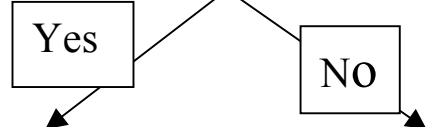

Mollusc

Has it got 6 legs?

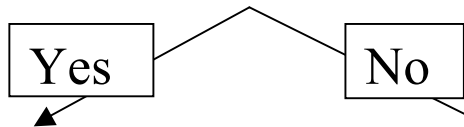

Birds

Does it have gills?

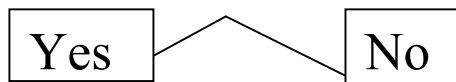

Insect

Arachnid

Fish

Does it lay eggs in water?

Amphibians

Reptiles

Vertebrates are animals with back bones

e.g. Humans, monkey, horse, dog, cat, snake, frog, crocodile, sheep,
newt, dolphins, whale, elephant, cow

These are subdivided into five classes.
**Mammals, Birds, Fish, Reptiles,
Amphibians**

Invertebrates are animals without back bones

e.g. Butterfly, fly, wasp, bee, snail, slug, octopus, squid, slug,
centipede, mosquito, ladybird

These are subdivided into three classes.
Insects, Arachnids, Molluscs

Insects are invertebrates

They have no backbone

They have six legs

They have three body parts –
head, thorax and abdomen.

e.g. bee, fly, wasp, butterfly, mosquito, ladybird

Arachnids are invertebrates

They have no backbone

They have eight legs

They have two body parts –
head and abdomen

e.g. spiders, scorpions

Birds are vertebrates

They have a backbone

They are warm blood

They have feathers

They have beaks

They lay eggs.

e.g. Ostrich, chicken, pigeon, sparrow, blackbird

Molluscs are invertebrates

They have no backbone

They have a slimy foot

They often have a shell

e.g. snails, slugs, octopus, squids,

Mammals are vertebrates

They have backbone

They have lungs

They are warm blooded

They have mammary glands to feed their babies

They give birth to live fully developed babies.

e.g. Humans, monkeys, Zebra, dog, mouse, horse, cat, mouse, elephant, Whale, dolphins.

Fish are vertebrates

They have a backbone

They are cold blooded

They have fins

They use gills to breath

e.g., cod, eel, goldfish, trout, salmon, plaice, sharks

Amphibians are vertebrates

They have backbone

They are cold blooded

They have slimy wet skin,

They can live in water and on
land

They have lungs

e.g. Frogs, newts, toads

Reptiles are vertebrates

They have back bones

They are cold blooded

They have scaly skin

They live on land

They have lungs for breathing

They lay eggs.

e.g. snake, crocodile, alligator, dinosaur,

Plants are divided into two
groups

Flowering Plants

Non-flowering plants.

Flowering Plants have
flowers

**e.g. roses, apple trees, oak trees, grasses, cereals,
daisies, tulips, cherry blossom**

Non-flowering Plants have no flowers

**e.g. algae (seaweed), fungi (mushrooms, mould),
conifers, ferns,**
